Front Access
48 x 2.5" HDD or 24 x 3.5" HDD

Rear Access
24 x 2.5" HDD or 12 x 3.5" HDD

■ RM41736 / 72

Chenbro RM417 server rackmount chassis breaks the traditional chassis design concept with new removable modular architecture. The hard drive (HDD) cages easily slides in and out of RM417. In addition, customer can mix 2.5 or 3.5 inch HDD inside RM417 with high degree of flexibility and versatility. RM417 has capacity of 24, 36 even 72 HDDs in 4U height, so it provides higher capacity and lower cost per unit than traditional chassis design. And in response to the growing data center needs for archiving file, RM417 supports 6 Gb/s SAS high-speed Expander solution, providing high data transfer rate, and satisfied user experience.

Rackmount HDD Tray

2011 Chenbro offers new generation of HDD carrier (T-Bar Tray) with versatile appearance on colors of T-bar plastic to present company professional image.
